

A plain cup of ice for off-premises consumption is taxable at the 6.25% rate plus local taxes. See 86 Ill. Adm. Code 130.310. (This is a GIL.)

December 16, 2005

Dear Xxxxx:

This letter is in response to your letter dated August 11, 2005, in which you request information. The Department issues two types of letter rulings. Private Letter Rulings ("PLRs") are issued by the Department in response to specific taxpayer inquiries concerning the application of a tax statute or rule to a particular fact situation. A PLR is binding on the Department, but only as to the taxpayer who is the subject of the request for ruling and only to the extent the facts recited in the PLR are correct and complete. Persons seeking PLRs must comply with the procedures for PLRs found in the Department's regulations at 2 Ill. Adm. Code 1200.110. The purpose of a General Information Letter ("GIL") is to direct taxpayers to Department regulations or other sources of information regarding the topic about which they have inquired. A GIL is not a statement of Department policy and is not binding on the Department. See 2 Ill. Adm. Code 1200.120. You may access our website at www.ILTAX.com to review regulations, letter rulings and other types of information relevant to your inquiry.

The nature of your inquiry and the information you have provided require that we respond with a GIL. In your letter you have stated and made inquiry as follows:

ABC requests a written opinion regarding the sales taxability to our customers on the purchase of the following item:

1. Plain cup with ice for off premises consumption. We do not supply table or chairs. We have installed a counter from which our customers can purchase bakery items, hot coffee, soda fountain drinks and icee's. Some customers prefer to soley [sic] purchase a cup filled with ice.

Thank you for your prompt attention to this matter.

DEPARTMENT'S RESPONSE

For your information, we refer you to of 86 Ill. Adm. Code 130.310, which is the Department's regulation for "Food, Drugs, Medicines and Medical Appliances." This regulation describes how sales of food and drugs can be subject to either the low (1%) or high (6.25%) State tax rates under the Retailers' Occupation Tax Act. Local sales taxes may also apply, depending upon where retail sales are made. Please note, however, that the Department is currently reviewing this regulation for changes.

Food is defined as any solid, liquid, powder or item intended by the seller primarily for human internal consumption, whether simple, compound or mixed, including foods such as condiments, spices, seasonings, vitamins, bottled water and ice. See Section 130.310(b)(1).

Products that do not meet the appropriate definitions of food, drugs, medicines or medical appliances, or are food prepared by the vendor for immediate consumption, are taxable at the higher State sales tax rate of 6.25% plus applicable local taxes. The manner in which food is taxed depends upon the nature of the establishment that is selling the food.

Retailers who provide seating or facilities for on-premises consumption of food generally incur tax at the high rate on all food sales (including bulk or grocery type items). However, if establishments sell both food that has been prepared for immediate consumption and bulk or grocery type items and also provide facilities for on-premises consumption, the lower rate of tax may be charged on the bulk or grocery type items only if the dining facilities are physically partitioned from the area where food not for immediate consumption is sold and these facilities utilize a separate means of collection of receipts. See 86 Ill. Adm. Code 130.310(b)(3).

If establishments have no seating or facilities for on-premises consumption of food, the tax rate incurred on food sales is determined by whether the majority (over 50%) are bulk or grocery type sales or are sales for immediate consumption. If more than 50% of all food sales are for immediate consumption, the retailer must charge the high rate on all food sales. If more than 50% of all food sales are bulk or grocery type items, all food sales are taxed at the low rate with the exception of hot foods, food that has been prepared for immediate consumption, alcoholic beverages, and soft drinks. See Section 130.310(a). Food for immediate consumption is defined in the regulation as hot food and food made ready by the retailer to be eaten without substantial delay after the final stage of preparation by the retailer. A plain cup of ice for off-premises consumption is taxable at the 6.25% rate plus local taxes.

I hope this information is helpful. If you require additional information, please visit our website at www.ILTAX.com or contact the Department's Taxpayer Information Division at (217) 782-3336. If you are not under audit and you wish to obtain a binding PLR regarding your factual situation, please submit a request conforming to the requirements of 2 Ill. Adm. Code 1200.110 (b).

Very truly yours,

Martha P. Mote
Associate Counsel
